

#### AxiaMed Payment Processing Helps You

- Eliminate double posting and manual errors by automatically posting payments to the Ledger.
- Increase revenue by collecting patient payments at point-of-care.
- Deliver a better patient experience with a streamlined, flexible payment solution.
- Stay HIPAA compliant with the only platform of its kind in the United States

## AXIAMED

Payment Processing That Works for You

---

### ALL-IN-ONE PAYMENT PROCESSING

Payment Fusion, AxiaMed's advanced payment technology platform, integrates seamlessly with Dentrix Enterprise to handle your patient payments from start to finish.

AxiaMed designed Payment Fusion to meet the rigorous and complex demands of enterprise health systems. Your practice can collect patient payments at your convenience, including at point-of-care. Patients are empowered to pay anywhere, anytime, via credit, debit, HSA/FSA card and EMV chip. They can swipe, dip or tap their payment cards, and the payment auto-posts to your Dentrix Enterprise Ledger. You can easily gain detailed transaction reporting, print or reprint receipts, or process payments as refunds and voids all in the same place.

### STATE-OF-THE-ART SECURITY

AxiaMed offers built-in security and compliance that meet the most stringent security requirements ever established by the PCI Security Standards Council. Their validated point-to-point encryption (vP2Pe)\* technology uses nondescript tokens to replace sensitive patient payment information, helping you decrease the risk of a payment data breach.

## KEY BENEFITS

**Improve Financial Performance** Collect patient payments at your convenience, including at point-of-care, with a variety of PAX Android payment devices that streamline and accelerate payment collection at point-of-care. Accept payments when it is convenient for you—at registration/check-in, during the visit or at check-out.

**Reduce Error and Administrative Load** Patient payments automatically post to the Dentrax Enterprise Ledger. Streamline administrative responsibilities and reduce error by eliminating double posting and manual entry.

**Increase Security and Fraud Protection** AxiaMed uses nondescript tokens to replace sensitive patient payment information and data. A remote-control center allows you to monitor terminal transactions any time, any place.

**Protect Patient Health Information** AxiaMed follows the security and privacy requirements of HIPAA regarding the safeguarding of protected health information (PHI) and conducts regular security risk assessments and network scans.

**Maximize Patient Satisfaction** Patients can choose their preferred method of payment and pay-up anywhere, anytime. Staff can devote more quality time to their patients instead of performing time-consuming manual entry.

## KEY FEATURES

### PAYMENT FUSION PLATFORM

- Automatically process credit card payments, refunds and voids
- Quickly print and reprint receipts
- Gain detailed transaction reports
- Recurring billing (coming soon), as well as an integrated CareCredit payment solution

### FLEXIBLE PAYMENT TECHNOLOGIES

- EMV compliant for credit, debit or HSA/FSA cards
- NFC-enabled payments (such as Apple Pay and Google Pay)

### VALIDATED POINT-TO-POINT ENCRYPTION (VP2PE)\*

Offers state-of-the-art security for point-of-care payment card transactions that meet the security requirements established by the PCI Security Standards Council.

### CLOUD-BASED SOLUTIONS

Payment Fusion's Control Center enables you to manage and monitor your payment terminals from anywhere, helps prevent device issues before they occur and offers remote upgrade capability when new software or security updates are released.
