

DENTRIX ENTERPRISE

Managing Your DSO or Group Practice With Ease

Increase organizational efficiency with a comprehensive practice management system that allows you to streamline procedures and meet productivity goals

Managing a DSO or group practice can be challenging and finding ways to increase efficiency is essential to keeping your practice on par with the best in the industry.

Bringing all of your data together into one central system with Dentrix Enterprise from Henry Schein One can help you standardize procedures for each location and staff member, which allows you to better promote efficiency, lower costs, and improve overall patient care.

Lisa Blair is the Chief Operating Officer for Inspire Dental Group, which opened in 2008 and has 80 employees across 3 locations in West Seneca, Buffalo, and Amherst, NY. Blair's managing partner selected Dentrix Enterprise as one of the few pieces of software that could manage his vision for their multiple locations.

Thanks to Dentrix Enterprise, Inspire Dental has centralized data, which means they can see what's going on across their practices with simple, standardized reporting, all in one place without having to compile a lot of disparate data. It also gives them the ability to have multiple providers in multiple locations.

"We're a multi-specialty group practice, so we have one-stop shopping for all specialties," explained Blair. "If a general dentist sees a patient at one location and their specialist, the oral surgeon, is at another, it's very easy within the system to schedule and share files across providers and locations."

Operating
Officer

"Our system is fully integrated thanks to Dentrix Enterprise, which helps us continue to be an efficient, paperless practice."

Features Sure to Please

One of Blair's favorite Dentrix Enterprise features is its "More Information" screen, which is essentially the patient's dashboard. "It gives you a summary of everything you would need to answer a phone call with a patient, from clinical information, to appointment scheduling, to billing history," she shared. "You can get everything you need and, from there, you can get

more detailed information because it's all linked together so we don't have to go in and out of multiple modules."

When Inspire Dental Group first started using Dentrix Enterprise, these types of features were used most frequently by the front desk staff. However, the more the teams across the organization taught the clinicians about the benefits of these tools and how they could be used to help them plan and prepare for their day, they started to use them daily as well.

System Integration for Increased Efficiency

Blair describes Dentrix Enterprise as "powerful and stable software." What she particularly enjoys about it is how it integrates with other services that Henry Schein One offers, such as electronic claims processing, billing services, credit card processing, and electronic prescription services, which are all accessed within Dentrix Enterprise.

"We use all of these services, and we love that we're able to customize the software to our needs," concluded Blair. "Our system is fully integrated thanks to Dentrix Enterprise, which helps us continue to be an efficient, paperless practice."
